

FOCUS on FOLDING

BAUM 20 Series Folders and the new *ifold*

BAUM is a market leader in developing and distributing the latest in folding technology. BAUM has over 90 years of experience in folding, more than almost all of our competitors combined! BAUM has recognized the need for on-site operation aids of the folding process to meet the needs of a tighter labor market and the cost competitive pressures on bindery and finishing providers. BAUM has developed a completely new and affordable concept called the BAUM *ifold* to meet the needs of our customers in a competitive marketplace. The BAUM 20 Pile and Continuous feed folders can be enhanced even further than our standard features by adding the BAUM *ifold*. Here are a few facts on this exclusive and patent pending BAUM product.

ifold

BAUM *ifold* can be added to the new model BAUM Pile and Continuous Feed folders either with a new machine order or after the machine is installed in the field.

- ***ifold*** is only available on selected newer model BAUM floor model folders.
- ***ifold*** can not be added to BAUM floor model folders that are not *ifold* compatible
- ***ifold*** is CIP4 and JDF compatible
- ***ifold*** is patent pending and is the sole property of BAUM.
- BAUM developed ***ifold*** to provide a lower cost productivity enhancing solution to folding for customers that do not require automation but want to make the process easier on floor model folding machines.
- ***ifold*** is an industrial touch-screen computer that is mounted to new BAUM ***ifold*** compatible floor model folders. ***ifold*** provides many features not found on other sophisticated automated folders.
- ***ifold*** provides information at the machine 24/7 for all operators of all skill levels.
- Review the ***ifold*** brochure for more details.
- Video presentations for all aspects of the folding process.
- Can save up to (100) jobs in memory
- User defined maintenance schedules with user defined alert
- 30+ preprogrammed folds
- Job Setup task list to track progress
- Fold production calculator
- (4) languages standard: English, German, French, Spanish
- Inch, Metric or custom paper size selection
- On-Screen parts and operation manuals
- And much, much more!
- Review the ***ifold*** brochure for more details.

The BAUM 20 Pile and Continuous Feed folder series now include these standard features that are enhanced even more by adding the *ifold* feature.

NEW removable slitter shafts that are a cartridge design.

NEW safety switches in the slitter shaft area to prevent the folder from operating when the shafts are removed.

NEW combination fold plate is standard in the #2 fold plate position. Eliminate the need to lower the fold plate to change from open to deflect.

NEW register rail design on non-operator side to support *ifold* option.

NEW stylish operator and non-operator guarding that covers entire frame from top to floor.
