

PRODUCT INFO

BUCKLE FOLDING MACHINES T 700 / T 800

PERFECTION FULLY-AUTOMATIC

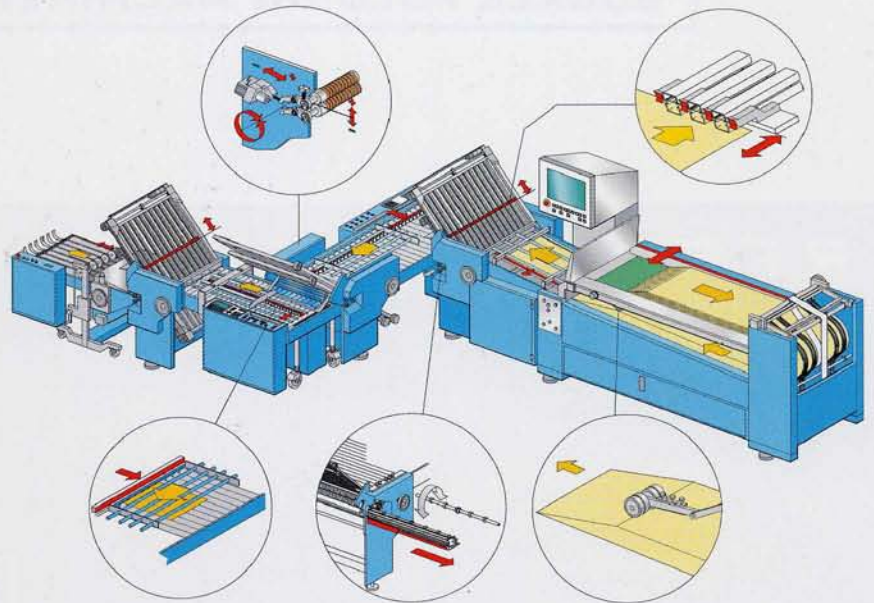

**Automatisation creates
increase of productivity**

MBO
Folding Technology

Shorter set-up and changeover times, higher availability, reduced costs per unit or less wasted sheets are no slogans, but reality for the Buckle Folding Machines T 700 and T 800 FULLY-AUTOMATIC from the MBO PERFECTION series.

BUCKLE FOLDING MACHINES T 700 / T 800 PERFECTION FULLY-AUTOMATIC

Technical data

Format T 800 / FULLY-AUTOMATIC

min. 17 x 25 cm (6 3/4" x 10")

max. 78 x 120 cm (30 3/4" x 47 1/4")

Feeder

Pile feeder

Palettized feeder

Continuous feeder

Versions

Various folding unit widths

8, 6, 4 and 2 buckle plates (not all folding units)

Speed

10 – 230 m/min.

The principle

Format changeovers in less than one minute are possible with the fully-automatic MBO Buckle Folding Machines T 700 / T 800 PERFECTION.

Manual setting of the feeder is effected after releasing the set-up process by pressing a button.

Through the digital machine control NAVIGATOR-Control and the electronic set-up system RAPIDSET, the following machine components position themselves by means of motors according to the job:

Feeder, alignment table, buckle plates/sheet deflectors, foldrollers, slitter shafts in all folding units as well as sidelay of the subsequent folding units.

Guide plates, guide rails and smoother bar elements are replaced by air tables and non-contact air smoother bars, independent in paper size.

Operational and set-up data, in JDF format, can be communicated through CIP 4 interfaces.
